

# Semi-annual VRE surveillance per canton (update Jul 31, 2022)

(Source: [www.anresis.ch](http://www.anresis.ch))

red bars = blood cultures yellow bars = non-blood culture samples (screening or clinical specimen)

Cantons with zero positive blood cultures AND less than 5 VRE-positive non-blood culture samples since 2020\_2 (AI/AR, GL, OW/NW, SH, SZ, UR, ZG) were excluded for better readability. \*see comment
